

All you can Learn: Romance languages starter workshop

Image source: generated with ChatGPT 4.0

In this introductory workshop, you will gain practical and entertaining access to three Romance languages. Instead of focusing on just one language, you will playfully discover similarities and differences between Italian, Spanish and French – and gain an initial insight into the dynamics of Romance multilingualism.

What can you expect?

Each language is presented in 30-minute slots – entertaining, interactive and accessible without any prior knowledge. By the end of the workshop, you will already be able to:

- greet people in all three languages
- talk about yourself (e.g. where you live, your studies, languages)
- express simple preferences and leisure activities
- and confidently distinguish between the languages.

Who is the workshop suitable for?

For all students – both those with no prior knowledge and those with some experience of a Romance language.
